NEELAM TOPNO

PRODUCT MANAGER | AI & ML Infrastructure | 0 to 1 Builder | Platform Scaling

Bangalore, India | neelam.topno3@gmail.com | +91-8083969915 | linkedin.com/in/neelam-topno-80a4b6104 | github.com/Neelam-Topno20

PROFESSIONAL SUMMARY

Product Manager with **6+** years in fintech and payments, specializing in AI-driven automation, 0-to-1 builds and platform scaling. At Pine Labs, shipped AI agents for merchant support and cybercrime complaint resolution, launched a SaaS billing platform that scaled to **₹50Cr** GTV in **45 days**, and owned revenue and roadmap across fuel retail, loyalty and airport lounge portfolios serving **1M+** users. Brings **4** years of payment systems engineering to product judgment: diagnosing root causes of low adoption, automating manual operations and scaling partner integrations reliably.

EDUCATION

Master of Business Administration, General Management (Product Management Electives)
Indian Institute of Management, Bangalore | 2022 – 2024

Bachelor of Technology (B.Tech), Electronics and Communication Engineering
National Institute of Technology, Jamshedpur | 2014 – 2018

WORK EXPERIENCE

Pine Labs | *Product Manager 1* | *May 2025 – Present*

AI INITIATIVES [Across Products]

- **Deployed** AI email agents — handling single- and multi-intent queries — that auto-triage and auto-respond to **59%** of inbound merchant emails, needing **13** fewer advisors and saving **₹54L** a year.
- **Directed CORA** (Complaint Resolution Agent) on Pine Labs' AgenticOrg platform — investigates cybercrime complaints from the National Cybercrime Reporting Portal (NCRP) and proposes a fund block, chargeback or bank notification, under mandatory human sign-off, with decisions feeding back to improve accuracy.
- **Designed** AI-powered training content (DIY guides and video modules) for **60K** merchants, increasing engagement **18.5%**.
- **Developed** internal AI tooling — copilot-assisted PRD generation and a PRD-to-JIRA workflow agent — cutting spec-to-ticket effort **25%** across **5+** initiatives.

PINEXPERT — SAAS BILLING PLATFORM [0 to 1 Launch]

- **Spearheaded** the **0 to 1** launch of PineXpert, a SaaS billing app, from concept to MVP to scale — onboarding retail, government and enterprise merchants; scaled to **₹50Cr** GTV within **45 days**, eliminated **₹3Cr/year** in third-party SaaS dependency, and drove **70%** MAU activation with improved retention.

ENERGY — FUEL & DEF RETAIL [Product Launch & Growth]

- **Diagnosed** flat activation as the growth bottleneck from transaction data, then ran merchant interviews to find the cause: a two-app journey re-asking outlet owners for details already given at onboarding. Cut activation from **4 steps to 1**; merchant activation **+15%**.
- **Launched** payments for DEF (Diesel Exhaust Fluid) stations for TATA, centered on the CRM integration they required — the differentiator over commodity card/UPI acceptance — posting vehicle number at fueling, replacing a fully offline flow; cut inventory management as low-impact. **₹35L/month** across **400+** stations.
- **Migrated** a petrol & diesel retailer off an incumbent POS vendor onto Pine Labs devices in **1 month**, and **accelerated** adoption across **100K** devices through funnel analysis and merchant insights, resolving multiple production issues surfaced in rollout.

LOYALTY — WALLETS & REDEMPTION [Pilot]

- **Validated** PMF of redemption use case by piloting Google Wallet-based in-store coupon with **2K+** users at Global Fintech Fest (GFF) 2025.

Pine Labs | *Associate Product Manager* | *May 2024 – May 2025*

LOYALTY - REWARDS, PAY BY POINTS, WALLETS [Product Launch & Growth]

- **Led** the loyalty & rewards portfolio against its revenue target, delivering **20%** revenue growth through **7** product launches & **3** strategic integrations.
- **Built** a merchant cashback platform **0 to 1** to lift low average ticket sizes, letting banks and brands fund offers at the point of sale; validated through a merchant pilot and beta before full rollout, then scaled to **47K** merchants and **80K daily transactions**.

AIRPORT LOUNGES [Network Integrations & Growth]

- **Launched** the **Visa** offer engine across all Pine Labs lounges, the first network live, adding **6K** daily transactions and **30%** lounge transaction value.
- **Executed** the RuPay BMS (Benefit Management System) rollout across **200+** BINs & **87** lounges, adding **4.5K** daily transactions and **20%** lounge transaction value.
- **Automated** the manual entitlement configuration through APIs after frequent bank and network rule changes caused wrong entitlements to reach cardholders and slowed bank/BIN onboarding; cut operational effort **25%**.

Pine Labs | *Product Intern, Digital Business* | *May – Jun 2023*

- **Redesigned** the Pine One merchant app, increasing DAU **30%** and sessions per user **20%**; converted to a full-time offer (**PPO**).

Talentica | *Senior Software Engineer* | *Oct 2019 – Jun 2022*

- **Developed** product features in close coordination with PMs, from spec to release, for two fintech clients' consumer apps serving **1M+** users; led A/B tests on key user flows that lifted activation rate, and designed a reusable multi-tenant framework so new client MVPs could launch faster.

Capgemini | *Software Engineer* | *Sep 2018 – Oct 2019*

- **Engineered** user-facing REST API interfaces and backend services for banking products, then led the migration of the payment systems to microservices for higher availability; load-tested **4** products to find and fix critical failures, preventing **₹15L+** in losses.

SKILLS

Product: Product Strategy, Product Roadmapping, Product Discovery, User Research, A/B Testing & Experimentation, Funnel Analysis, Go-to-Market (GTM), PRDs, Stakeholder Management
Domain: Payments, Fintech, POS, UPI, Card Networks (Visa, RuPay), Loyalty & Rewards, Merchant Onboarding, API & Partner Integrations
Analytics & Data: SQL, MySQL, PostgreSQL, Snowflake, Python, Excel, Tableau, Power BI, Looker, Google Analytics, Mixpanel, Amplitude
Cloud & CRM: AWS, Azure, Salesforce
Product & Delivery Tools: Jira, Confluence, Aha!, Figma, Miro, Postman, PowerPoint, VS Code, Replit
AI Tools: Claude, ChatGPT, Gemini, GitHub Copilot, Codex, AI Agents

ACHIEVEMENTS & CERTIFICATIONS

- **Regional Finalist**, Samsung EDGE 8: 3-member team, one of **6+** finalist teams from **14K+** registrations (Gen AI for customer centricity), IIM Bangalore 2023
- **National 2nd Runner-Up**, Prodylitics product management & analytics competition on user retention, out of **60** competing teams, IIM Indore 2023
- **Certifications:** Generative AI Leader | Product-Led Growth Micro-Certification (PLGC) | Machine Learning Product Management
